Professional Summary

Results-driven B.E. Computer Science student specializing in Cybersecurity, System Design, and API Integration. Adept at rapid prototyping and LLM-assisted developer workflows to accelerate delivery cycles. Proven track record in building resilient web architectures and streamlining security operations through automation and efficient backend integration.

Technical Skills

Rapid Prototyping & AI: Accelerated Development Lifecycles, LLM-Assisted Architecture, Prompt Engineering, Workflow Automation

Core Technologies: React, Next.js, Tailwind CSS, Node.js, Supabase (SQL), Python.

Web & DevOps: Responsive Frontend Frameworks, Cloud Infrastructure, Docker Containerization, Version Control (Git)

Internship Experience

Cyber Security Intern | Codec Technologies Pvt. Ltd. | Dec 2025 – Jan 2026

Identified and mitigated web application vulnerabilities using industry-standard security frameworks. Documented remediation strategies and integrated secure coding practices into the development pipeline.

Impact: Documented remediation workflows to streamline application security processes.

Web Development Intern | CodSoft | Aug 2025

Architected and deployed high-performance web applications (portfolio, landing page, job board) with a focus on API connectivity and input sanitization. Leveraged AI co-piloting to optimize code generation and system debugging.

Impact: Accelerated delivery of 3 responsive web projects using AI co-piloting.

Projects

Monix-web-OS | Cloud OS Portfolio | 2025

Engineered a browser-based OS using React and Supabase, featuring a custom Virtual File System (VFS), complex P2P networking for multiplayer interactions, and integrated AURA Voice AI via API.

Impact: Resulted in a scalable, interactive cloud OS experience leveraging P2P networking and VFS.

Phishing Awareness Simulator | Security Education Tool | 2025

Designed an ethical security training platform using LLM-generated templates to simulate credential-harvesting risks and test system resilience against social engineering.

Impact: Created a safe, effective awareness training tool with LLMs for realistic simulations.

Sentinel Next-Gen SOC | Autonomous Security Operations Center

Developed an autonomous security monitoring pipeline using Python and Docker with real-time threat detection and automated response capabilities, focusing on scalable system architecture.

Impact: Established a foundational security monitoring pipeline using automation concepts.

Freelance Client Projects | Sangeetha Makeover & Moni Aari Works | 2024 – 2025

Impact: Improved client digital presence and lead generation through SEO and Core Web Vitals focus.

Leadership & Achievements

- **Co-Organizer & Tech Lead, CYKRYPT (2025 & 2026):** Managed national-level cybersecurity symposiums and designed the 5-stage 'Operation BLACK VEIL' Capture The Flag challenge.
- **Team Captain, Cognizant Technoverse Hackathon (2026):** Led a team to design and pitch a GenAI workflow for system resilience.
- **Certifications:** Gemini Certified University Student (2026) | Cisco Networking Basics & Foundational Hacking | Intro to API Pentesting & Bug Bounty 101 | Social Engineering

Education

B.E. Computer Science & Engineering (Cybersecurity)

Arunai Engineering College, Tamil Nadu | 2023 – 2027 (Expected)
