Professional Summary

Highly motivated B.E. Computer Science (Cybersecurity) student focused on foundational concepts in secure design and AI-Assisted Developer workflows. Seeking a hands-on internship opportunity to apply rapid, LLM-assisted development and automation skills. Eager to build resilient solutions, streamline security processes, and create an immediate, positive impact for the team.

Technical Skills

AI & Accelerated Development: Prompt Engineering, LLM-Assisted Prototyping, AI-Driven Workflow Automation, Rapid Iteration Cycles

Security Fundamentals: Networking Basics, Basic Security Concepts, Secure Coding Principles, Data Protection Awareness

Web & Infrastructure Concepts: Responsive Design, Cloud Backend Concepts, Version Control, Docker (Conceptual)

Internship Experience

Cyber Security Intern | Codec Technologies Pvt. Ltd. | Dec 2025 – Jan 2026

Explored core security concepts, including common web application risks and security best practices for software development. Documented methods for finding and fixing security issues.

Impact: Developed foundational understanding of application security risks and basic remediation processes.

Web Development Intern | CodSoft | Aug 2025

Delivered three complete web projects (portfolio, landing page, job board) applying mobile-first design and input sanitization. Reduced prototype-to-deployment time by leveraging AI tools for code generation and debugging assistance.

Impact: Delivered 3 responsive web projects, accelerating development using AI co-piloting.

Projects

Monix-web-OS | Cloud OS Portfolio | 2025

Browser-based cloud OS feature a custom Virtual File System (VFS), P2P multiplayer ecosystem and integrated AURA Voice AI.

Impact: Resulted in a scalable, interactive cloud OS experience leveraging P2P networking and VFS.

Phishing Awareness Simulator | Security Education Tool | 2025

Developed an ethical phishing simulation platform with LLM assistance to generate realistic phishing templates and safely demonstrate credential-harvesting risks.

Impact: Created a safe, effective awareness training tool with LLMs for realistic simulations.

Sentinel_SOC | Autonomous Security Operations Center

Explored Autonomous SOC platform concepts with real-time threat detection, AI-driven analysis, and automated response capabilities.

Impact: Established a foundational security monitoring pipeline using automation concepts.

Freelance Client Projects | Sangeetha Makeover & Moni Aari Works | 2024 – 2025

Impact: Improved client digital presence and lead generation through SEO and Core Web Vitals focus.

Leadership & Achievements

Co-Organizer: CTF Event in CYKRYPT (2025 & 2026) (2 years)

Cognizant Technoverse Hackathon (2026): Participated and designed a GenAI workflow for resilience.

Certifications

Networking Basics — Cisco | Foundational Hacking Concepts — Cisco | Introduction to API Pentesting & Bug Bounty 101 | Social Engineering and Ethical Hacking

Education

B.E. Computer Science & Engineering (Cybersecurity)

Arunai Engineering College, Tamil Nadu | 2023 – 2027 (Expected)
